PROFESSIONAL SUMMARY

Results-driven Backend Developer with **expertise in Python, Django REST Framework**, and SQL. Skilled in building and optimizing scalable **RESTful APIs**, database design, and implementing, authentication/authorization, **and collaborating with frontend teams using** foundational knowledge of React. **Accomplished a** Data Science internship **with exposure to** machine learning and data visualization. **Passionate about delivering** scalable and efficient applications **while continuously enhancing technical expertise.**

EDUCATION

Master of Computer Application (MCA) – 86.4%	2019 – 2021
Dr. Virendra Swarup Institute of Computer Studies, Kanpur, Uttar Pradesh	
Bachelor of Computer Application (BCA) – 71.02%	2016 – 2019
Dr. Virendra Swarup Institute of Computer Studies, Kanpur, Uttar Pradesh	
Intermediate (12th) – 75.4% U.P. Board, Kanpur	2015
High School (10th) – 82.83% U.P. Board, Kanpur	2013

SKILLS

Technical Skills:

- **Programming:** Python, SQL, Django, Java
- **Data Analytics:** Pandas, NumPy, Matplotlib, Scikit-learn
- **Data Visualization:** Power BI
- **Database Management:** MySQL, PostgreSQL
- **Other Tools:** Postman, Jupyter Notebook, Python Shell

PROFESSIONAL EXPERIENCE

Backend Developer <i>Esperance Technologies Pvt. Ltd.</i>	Sep 2024 - Present
• Built secure, scalable REST APIs using Django REST Framework in a monolithic architecture for SaaS products. • Boosted API response time by ~30% through query optimization and caching strategies. • Planned and rolled out key features including RBAC, token-based authentication, and API versioning, reducing access issues by 40%. • Administered PostgreSQL (production) and SQLite (development) to ensure reliable, scalable data storage for thousands of records. • Partnered with frontend engineers to achieve 100% functional integration, reducing deployment bugs significantly.	
Data Science Intern <i>NullClass Edtech Pvt. Ltd. (Remote)</i>	May 2024 - Aug 2024
• Demonstrated proficiency in applying core concepts of Data Science, including data cleaning, preprocessing, and exploratory data analysis. • Completed multiple tasks using Python, SQL, and basic machine learning algorithms on real-world datasets. • Worked on data visualization techniques to represent insights effectively and improve decision-making.	

- Worked on Java development with focus on backend and application logic.
- Contributed to building a web-based application for managing records, appointments, and services in the healthcare domain.
- Gained practical exposure to JSP, Servlets, and MySQL integration for building dynamic web applications.

PROJECTS

Emotional Detector (Python, Machine Learning, TensorFlow, Keras, CNN)

- Built a deep learning model to detect human emotions from images using Convolutional Neural Networks (CNNs).
- Applied TensorFlow and Keras for model training and evaluation on image datasets.
- Achieved accurate classification of multiple emotions such as happy, sad, angry, and neutral.

Travel Itinerary and Budget Planner (Django REST Framework, Gemini API, Overpass API)

- Architected and deployed REST API backend to generate personalized travel itineraries and budgets.
- Integrated **Gemini API** for AI-powered recommendations and **Overpass API** for real-time tourist data.
- Reduced data retrieval time to **<200ms** by optimizing endpoints for scalable performance.

Vendor Performance Analysis – Retail Inventory & Sales (SQL, Python)

- Constructed and optimized a complex SQL ETL pipeline to generate aggregated summary tables from multiple data sources, leveraging CTEs and filtering techniques to significantly improve performance and reduce query runtime on large datasets.
- Conducted **Exploratory Data Analysis and Hypothesis Testing in Python** to evaluate vendor profitability, pricing strategy effectiveness, and inventory turnover.
- Identified over-dependence on top 10 vendors (65.7% purchases) and uncovered \$2.71M unsold inventory from low-performing vendors, recommending diversification and inventory optimization.

College Management System (HTML, CSS, JSP, Java, MySQL) – Built a system to manage student records, fees, results, and faculty details with database-driven automation.

Online Notice Board (HTML, CSS, JSP, Java, MySQL) – Launched a digital notice board to upload and display notices, eliminating reliance on physical boards.

CERTIFICATIONS

- **HP LIFE** – AI for Beginners (Issued Feb 2025)
- **HP LIFE** – Data Science and Analytics (Issued Jan 2025)
- **NullClass** – 3-Month Internship in Data Science
- **NullClass** – Online Training in Emotional Detector
- **Internshala** – 8-Week Online Training in Data Science
- **Simplilearn**-Power BI for Beginners
- **Infoseek Technologies Pvt. Ltd.** – 5-Month Internship in Java

EXTRA-CURRICULAR ACTIVITIES

- Attended workshops on Cyber Security and AI applications.
- Active on GitHub with Data Science and Backend projects (Python, Django, ML).
- Received merit certificates for third rank in High School and first rank in Science Exhibition.
